

Secure, Scalable SMS APIs

To Suit Your Business

Reliable, quick, and easy-to-use broadcast & conversational SMS automation

Connect directly to your applications using one of our four APIs, including fall-back options. The platform offers various languages, supports domestic and international SMS destinations, and optional shortcode (NZ) and Sender ID (AUS) registration.

→ We have an **Intelligent Messaging API** for WhatsApp with SMS fallback.

Benefits of Modica's SMS APIs

Scalable SMS

Grow and scale from programmatic HTTPS delivery through to high-volume, async delivery with REST.

Easy Auth & Security

API keys, token-based auth, secure HTTPS, MTLS. Configure staggered-send and business-hour blocks.

Continuous Visibility

Real-time callbacks, message response tracking, and reporting are all standard with our API.
